Spring, 1930

▼ LOCATION ▼

Railroad — Main Line
Erie R. R.

Auto — 8 Miles North
of Paterson, N. J., on
the Franklin Turnpike,
Route 2.

Suggestions for the Care of Grafted Stock

OUR PLANTS are grafted on transplanted understock supplied out of 2 $\frac{1}{4}$ inch and 2 $\frac{1}{2}$ inch pots and are well hardened before shipment.

This stock should be planted in beds the first year and shaded with lath screen giving about 50 per cent sunlight. Beds should be covered with peat moss after planting and enough water used to keep soil moist at all times. By doing this, the plants will make growth and transplant to the nursery rows the following year without loss.
